### IMPORTANT FACTS

This is only a brief summary of important information about taking TRUVADA for PrEP™ (pre-exposure prophylaxis) to help reduce the risk of getting HIV-1 infection. This does not replace talking to your healthcare provider about your medicine.

### POSSIBLE SIDE EFFECTS OF TRUVADA FOR PrEP

**TRUVADA** can cause serious side effects, including:
- Those in the “Most Important Information About TRUVADA for PrEP” section.
- New or worse kidney problems, including kidney failure.
- Too much lactic acid in your blood (lactic acidosis), which is a serious but rare medical emergency that can lead to death. Tell your healthcare provider right away if you get these symptoms: weakness or being more tired than usual, unusual muscle pain, being short of breath or fast breathing, stomach pain with nausea and vomiting, cold or blue hands and feet, feeling dizzy or light-headed, or a fast or abnormal heartbeat.
- Severe liver problems, which in rare cases can lead to death. Tell your healthcare provider right away if you get these symptoms: skin or the white part of your eyes turns yellow, dark “tea-colored” urine, light-colored stools, loss of appetite for several days or longer, nausea, or stomach-area pain.
- Bone problems.

Common side effects in people taking TRUVADA for PrEP include stomach-area (abdomen) pain, headache, and decreased weight.

These are not all the possible side effects of **TRUVADA**. Tell your healthcare provider right away if you have any new symptoms while taking **TRUVADA** for PrEP.

Your healthcare provider will need to do tests to monitor your health before and during treatment with TRUVADA for PrEP.

### BEFORE TAKING TRUVADA FOR PrEP

**Tell your healthcare provider if you:**
- Have or have had any kidney, bone, or liver problems, including hepatitis.
- Have any other medical conditions.
- Have or have had any kidney, bone, or liver problems, including hepatitis.
- Are breastfeeding (nursing) or plan to breastfeed. Do not breastfeed. If you become HIV-positive, HIV can pass to the baby in breast milk.

**Tell your healthcare provider about all the medicines you take:**
- Keep a list that includes all prescription and over-the-counter medicines, vitamins, and herbal supplements, and show it to your healthcare provider and pharmacist.

**Ask your healthcare provider or pharmacist about medicines that should not be taken with TRUVADA for PrEP.**

### HOW TO FURTHER REDUCE YOUR RISK

- Know your HIV status and the HIV status of your partners.
- Get tested for other sexually transmitted infections. Other infections make it easier for HIV to infect you.
- Get information and support to help reduce risky sexual behavior, such as having fewer sex partners.
- Do not share needles or personal items that can have blood or body fluids on them.
